

AHMED GABER Backend Developer (Python | Django | DRF)

 ahmed.gaber.dev@gmail.com  +201004968716  Sharqia  [GitHub](#)  [LinkedIn](#)  [Portfolio](#)

SUMMARY

Backend Developer focused on building scalable and high-performance systems with Django and DRF. Experienced in asynchronous architectures, caching strategies, and real-time applications using Redis, Celery, and WebSockets.

PROJECTS

E-Commerce REST API, *Django | DRF | PostgreSQL | Redis | Celery | JWT | Docker*

- [[Live Demo](#)] [[GitHub](#)]
- Designed and developed 25+ RESTful API endpoints covering products, cart, orders, wallet, and user management
- Built JWT-based authentication system with custom user model and role-based access control
- Integrated Redis caching to optimize frequently accessed endpoints, reducing response times by ~50%
- Secured the API with HTTPS using Let's Encrypt and domain configuration (DuckDNS)
- Offloaded background operations (notifications, order processing) to Celery, reducing API blocking time from ~2s to <200ms
- Configured NGINX as a reverse proxy to route requests to backend services while serving static and media files with caching
- Implemented Stripe payment integration with webhook handling for secure wallet transactions
- Containerized the application using Docker Compose for consistent development and deployment environments
- Deployed the application on AWS EC2

WhatsApp Clone (Real-Time Chat App), *Django DRF Channels WebSockets PostgreSQL JWT Docker*

- [[Live Demo](#)] [[GitHub](#)]
- Implemented OTP-based authentication and JWT authorization for secure user sessions
- Designed group chat system with role-based permissions (admin/user)
- Optimized message delivery latency through persistent WebSocket connections
- Containerized application using Docker and documented APIs with Swagger/OpenAPI

Publisher Statistics Service – Open Source Contribution, *Tech Stack: Django, Django Ninja, Redis, Celery, PostgreSQL*

- [[Link](#)]
- Engineered a scalable statistics endpoint for aggregated publisher data
- Implemented Redis-based caching, reducing average response time from ~400ms to ~120ms, significantly lowering query load
- Designed asynchronous processing pipeline using Celery and Celery Beat for scheduled background tasks
- Ensured data consistency through event-driven cache invalidation using Django signals
- Wrote unit tests to validate caching logic, data correctness, and access control

Online Learning Platform (Coursera-like), *Django 5 DRF PostgreSQL Redis Celery JWT PayPal SDK*

- [[Link](#)]
- Developed modular backend system supporting course management, user roles (students/instructors), and content delivery
- Built secure JWT authentication and authorization system for multi-role access
- Integrated PayPal payment workflow (order creation and capture) for course purchases
- Applied Redis caching to improve performance of course listing and retrieval endpoints
- Structured project using clean, modular architecture to improve scalability and maintainability

SKILLS

Backend & Core Technologies: Django, Django REST Framework, JWT Authentication, Celery, Clean Architecture

Programming: Python, C, C++

Frontend: HTML, CSS

Tools & DevOps: Docker, Git & GitHub, Postman, Linux, Swagger, Unit Testing, NGINX, AWS

Databases: PostgreSQL, MySQL, SQLite, Redis, MongoDB

Core Programming Concepts: OOP, design pattern, solid principle

Experience

DIGITOPIA (AI & Software Competition) MCIT - Ministry of Communications & Information Technology

- [[Certification Link](#)]
- Collaborated with cross-functional team members during a competitive tech environment.
- Gained experience working under pressure while meeting deadlines and shared objectives.

CIS Team MU – Django Backend Circle

- [[Certification Link](#)]
- Recognized as a Top Member for outstanding performance and dedication in the Django Backend circle.
- Collaborated with backend team members to build and debug APIs and backend services.

LANGUAGES

Arabic Native	English B2
-------------------------	----------------------

EDUCATION

Bachelor's in Management Information Systems, *Mansoura Higher Institute*
